PRODUCTION NOTES FOR ILLUSTRATOR/AI GENERATION

File Specifications:

- Interior pages: 300 DPI, 8.5" x 11", black and white only (no grayscale)
- Cover: 300 DPI, CMYK color, dimensions per KDP cover calculator (include spine width based on page count)
- File format: PDF (print-ready) or high-res PNG
- Bleed: None for interior; 0.125" for cover

Style Consistency Rules:

- All human figures should have the same proportions (large heads, round faces, dot eyes or simple eyes)
- Line weight must be consistent throughout (2-3pt for outlines, 1pt for interior details)
- All animals should be friendly/cartoonish (never realistic or scary)
- Biblical figures should be modest, simple robes, no graphic violence
- Diversity: Include various skin tones and hair types in group scenes
- Avoid any denominational-specific symbols (keep broadly Christian)

AI Generation Tips:

- Add "coloring book page" to every prompt for interior pages
- Add "no gray, no shading, no fills, pure black lines on white" to avoid AI adding tones
- If AI generates too much detail, add "simplified, kindergarten level, very simple shapes"

- For consistent characters, describe them the same way each time (e.g., "Jesus: kind-faced man with shoulder-length hair, simple robe, gentle smile")
- Generate at highest resolution available, then clean up in vector software if needed
