

ADHD HABIT TRACKER BUNDLE

Build Habits That Actually Stick (for Once)

By Daniel Tesfamariam | FocusFlow Prints

HABIT BUILDING FOR ADHD BRAINS

Why traditional habit tracking fails us:

- We pick too many habits at once (max 3-4!)
- All-or-nothing thinking ('I missed one day, it's over')
- No external rewards built in (dopamine needs!)
- Boring visual trackers that lose novelty

THIS tracker fixes all of that. Three different styles (because variety!) and built-in rewards.

MY HABIT MENU - Choose 3-4 MAX

Circle or check the habits you want to build:

HEALTH:

☐ Drink water ☐ Take meds ☐ Move 10 min ☐ Sleep by ____ ☐ Eat a vegetable

PRODUCTIVITY:

☐ Make bed ☐ Plan tomorrow ☐ Top 3 tasks ☐ Time block ☐ Brain dump

SELF-CARE:

☐ Shower/hygiene ☐ Go outside ☐ Journal ☐ No phone 1hr ☐ Gratitude

CUSTOM:

☐ _____ ☐ _____ ☐ _____

HABIT STACKING TEMPLATE

Attach new habits to existing ones. Your brain already does the first part!

After I _____ (existing habit),
I will _____ (new habit).

After I _____ (existing habit),
I will _____ (new habit).

After I _____ (existing habit),
I will _____ (new habit).

MY REWARD SYSTEM

ADHD brains need external rewards. Plan them in advance!

7 days streak: Reward: _____

14 days streak: Reward: _____

21 days streak: Reward: _____

30 days streak: BIG Reward: _____

RESTART WITHOUT SHAME

You missed days. That's literally what ADHD does. Here's what to do:

- Step 1: Notice (done - you're here!)
- Step 2: Skip the guilt. It's not helpful.
- Step 3: Ask: Is this habit still right for me? ☐ Yes ☐ No -> swap it
- Step 4: Restart with the MINIMUM version tomorrow
- Step 5: 3 days minimum version, then build up

Number of times I've restarted: _____ (this number = resilience, not failure)
