CHAPTER 1: DIGITAL OVERWHELM ASSESSMENT

The Digital Clutter Crisis

We live in an unprecedented era of digital overload. The average person checks their phone 96 times per day, has 40 apps installed, receives 121 emails daily, and spends over 7 hours per day on screens. This constant digital stimulation creates chronic stress, reduces attention spans, hampers creativity, and leaves us feeling perpetually behind.

Digital clutter is just as draining as physical clutter, yet most people never address it. Overflowing inboxes, chaotic file systems, endless notification pings, and cluttered desktops create a low-grade anxiety that saps your energy and focus throughout the day.

This workbook provides a systematic approach to decluttering every aspect of your digital life and building sustainable habits that keep it organized permanently.

Digital Overwhelm Self-Assessment

Rate each statement from 1 (never) to 5 (always):

- ___ I feel anxious when I see my number of unread emails
- ___ I spend time scrolling social media when I should be working
- ___ I cannot find files or documents when I need them
- ___ I have multiple tabs open that I never get back to
- ___ My phone notifications interrupt my focus multiple times per hour
- ___ I feel guilty about my screen time
- ___ I subscribe to newsletters I never read
- ___ My desktop is cluttered with files
- ___ I have apps on my phone I have not used in months
- ___ I check my phone first thing in the morning and last at night
- ___ I lose track of passwords and account information
- ___ I have duplicate files saved in multiple locations
- ___ I feel overwhelmed by the amount of digital content to consume
- ___ I have trouble focusing for more than 20 minutes without checking my phone
- ___ My photos are unorganized with thousands I will never look at again

TOTAL SCORE: ____ / 75

Scoring: 15-25 Mild | 26-45 Moderate | 46-60 Significant | 61-75 Severe

My Current Digital Inventory

Take stock of your current digital situation:

Number of apps on my phone: ____

Unread emails right now: ____
Email accounts I manage: ____
Social media platforms I use: ____
Daily average screen time (check phone settings): ____ hours
Number of open browser tabs right now: ____
Files on my desktop: ____
Subscriptions I pay for monthly: ____
Photos in my camera roll: ____
Unread text/message notifications: ____

My Digital Pain Points

What frustrates me most about my digital life:

1. _____
2. _____
3. _____

What I wish my digital life looked like:

1. _____
2. _____
3. _____

How digital clutter affects my daily life:

YOUR ACTION ITEMS - Chapter 1

-
- [] Complete the Digital Overwhelm Self-Assessment
 - [] Fill out your Current Digital Inventory (actual numbers)
 - [] Identify your top 3 digital pain points
 - [] Check your phone screen time report for the past week
 - [] Write down your vision for an organized digital life
 - [] Commit to working through one chapter per day

CHAPTER 2: PHONE DECLUTTER SYSTEM

Your Phone Is Your Biggest Distraction

Your smartphone is the single most powerful tool for productivity or the single biggest source of distraction in your life. The difference comes down to how intentionally you set it up. Most people use their phone on autopilot with default settings designed by companies whose business model is to maximize your screen time.

This chapter walks you through a complete phone declutter that typically takes 60-90 minutes but saves you hours every week going forward.

Step 1: App Audit

Go through EVERY app on your phone. For each one, decide: Keep, Delete, or Move to back pages. An app earns its place on your phone only if you use it at least weekly AND it adds genuine value to your life.

Apps to DELETE (ones I never or rarely use):

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____
11. _____
12. _____
13. _____
14. _____
15. _____

Apps to KEEP (daily/weekly use, genuine value):

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____

8. _____
9. _____
10. _____
11. _____
12. _____
13. _____
14. _____
15. _____

Apps to MOVE to back pages (occasional use):

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Step 2: Notification Audit

Most apps default to maximum notifications. Each notification interrupts your focus and takes an average of 23 minutes to fully recover your concentration. Be ruthless about which apps deserve to interrupt you.

Notifications ALLOWED (urgent, time-sensitive):

- Phone calls: YES
- Text messages: YES (but consider Do Not Disturb schedules)
- Calendar: YES

Others: _____

Others: _____

Notifications DISABLED (everything else):

- Social media: ALL OFF
- Shopping apps: ALL OFF
- News apps: ALL OFF
- Games: ALL OFF
- Email (check on schedule instead): OFF or VIP only

Others disabled: _____

Others disabled: _____

Step 3: Home Screen Redesign

Your home screen should contain only tools that help you be productive, connected, and intentional. Social media and entertainment apps should never be on your home screen because they trigger mindless scrolling.

My Ideal Home Screen Layout:

Row 1: _____ | _____ | _____ | _____
Row 2: _____ | _____ | _____ | _____
Row 3: _____ | _____ | _____ | _____
Row 4: _____ | _____ | _____ | _____
Dock: _____ | _____ | _____ | _____

Recommended home screen apps: Phone, Messages, Calendar, Camera, Notes, Maps, Weather, Music

Step 4: Photo Library Cleanup

Most people have thousands of photos they will never look at again - blurry shots, duplicates, screenshots of things long resolved, and photos of menus or signs. A lean photo library makes it easier to find the memories that matter.

Photo Declutter Plan:

- [] Delete all blurry or duplicate photos
- [] Delete old screenshots no longer relevant
- [] Delete photos of text, receipts, or temporary info
- [] Create albums for important events (vacation, birthday, etc.)
- [] Back up photos to cloud storage (Google Photos, iCloud)
- [] Delete photos from device after backing up

Photos before cleanup: _____

Photos after cleanup: _____

Storage freed up: _____ GB

Step 5: Contacts Cleanup

Your contacts list likely contains hundreds of people you no longer recognize or communicate with. A clean contacts list makes it faster to find who you need and reduces digital clutter in one more area of your phone.

Contacts Cleanup Checklist:

- [] Delete contacts with no name or unrecognizable numbers
- [] Merge duplicate contacts
- [] Update outdated phone numbers and emails
- [] Add missing information to important contacts
- [] Organize contacts into groups (Family, Work, Friends, Services)
- [] Delete contacts from companies or services you no longer use
- [] Back up contacts to cloud before making major deletions

Contacts before cleanup: _____
Contacts after cleanup: _____
Duplicates merged: _____

Step 6: Message & Chat Cleanup

Text messages and chat apps accumulate gigabytes of data over time. Old group chats, media files, and conversations with people you no longer talk to all take up space and mental energy.

Message Cleanup Checklist:

- ☐ Leave group chats you no longer participate in
- ☐ Delete conversations with businesses (appointment confirmations, etc.)
- ☐ Clear media from old conversations (photos, videos take most space)
- ☐ Archive important conversations you want to keep but not see daily
- ☐ Mute notifications for low-priority group chats
- ☐ Uninstall messaging apps you rarely use

Group chats left: ____
Conversations deleted: ____
Storage freed: ____ GB

Step 7: Subscription Audit

Check your app store subscriptions. Most people are paying for services they forgot about or no longer use. The average person wastes \$30-50/month on unused subscriptions.

Current Subscriptions:

Service | Monthly Cost | Still Using? | Action

1. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
2. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
3. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
4. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
5. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
6. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
7. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
8. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
9. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
10. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
11. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
12. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
13. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
14. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel
15. _____	\$ _____	☐ Yes ☐ No	☐ Keep ☐ Cancel

Total monthly subscription cost: \$_____

Amount saved by canceling unused: \$_____

Annual savings: \$_____

YOUR ACTION ITEMS - Chapter 2

- ☐ Complete the full app audit (delete, keep, move)
- ☐ Disable notifications for all non-essential apps
- ☐ Redesign your home screen for intentionality
- ☐ Spend 30 minutes cleaning up your photo library
- ☐ Audit and cancel unused subscriptions
- ☐ Set up screen time limits for social media apps
- ☐ Enable Do Not Disturb schedule for focus hours

CHAPTER 3: EMAIL INBOX ZERO

The Inbox Zero Philosophy

Inbox Zero does not mean you have zero emails in your inbox at all times. It means your inbox is a processing station, not a storage system. Every email that comes in gets processed (reply, archive, delegate, delete, or defer) rather than sitting there creating mental clutter and guilt.

The goal is to check email intentionally at scheduled times, process everything that came in, and then close your email until the next scheduled check. This eliminates the constant low-grade anxiety of an overflowing inbox and the productivity-killing habit of checking email every few minutes.

Step 1: The Great Email Purge

If you have hundreds or thousands of unread emails, do not try to read them all. Use this triage approach:

- Select all emails older than 30 days and ARCHIVE them (not delete)
- If anything was truly urgent from 30+ days ago, someone would have followed up
- Search for and delete all promotional emails in bulk
- Unsubscribe from every newsletter you have not read in the past month
- Create a TEMP folder and move remaining old emails there for later review

Emails before purge: _____

Emails after purge: _____

Newsletters unsubscribed from: _____

Step 2: Unsubscribe Sprint

Track every newsletter and promotional email you unsubscribe from:

1. _____ ☐ Done
2. _____ ☐ Done
3. _____ ☐ Done
4. _____ ☐ Done
5. _____ ☐ Done
6. _____ ☐ Done
7. _____ ☐ Done
8. _____ ☐ Done
9. _____ ☐ Done
10. _____ ☐ Done
11. _____ ☐ Done

12. _____ ☐ Done
13. _____ ☐ Done
14. _____ ☐ Done
15. _____ ☐ Done
16. _____ ☐ Done
17. _____ ☐ Done
18. _____ ☐ Done
19. _____ ☐ Done
20. _____ ☐ Done
21. _____ ☐ Done
22. _____ ☐ Done
23. _____ ☐ Done
24. _____ ☐ Done
25. _____ ☐ Done

Step 3: Create Your Folder System

Keep your folder/label system simple. Too many folders creates just as much overwhelm. Here is a proven minimal system:

Recommended Folder Structure:

- INBOX (processing station - aim to empty daily)
- ACTION REQUIRED (emails that need a response or task)
- WAITING FOR (emails where you are waiting on someone else)
- REFERENCE (important info you may need to find later)
- ARCHIVE (everything else - searchable but out of sight)

My folder system:

1. _____
2. _____
3. _____
4. _____
5. _____

Step 4: Email Processing Schedule

Instead of checking email constantly, schedule specific times:

Morning check: _____ (process for ____ minutes)

Midday check: _____ (process for ____ minutes)

End of day check: _____ (process for ____ minutes)

The 4-D Method for processing each email:

- DELETE - if it requires no action and has no reference value
- DO - if it takes less than 2 minutes, do it immediately
- DELEGATE - if someone else should handle it, forward it now

- DEFER - if it takes longer than 2 minutes, move to Action folder

Step 5: Email Templates

Create templates for emails you send repeatedly to save time:

Template 1: _____

Subject: _____

Body: _____

Template 2: _____

Subject: _____

Body: _____

Template 3: _____

Subject: _____

Body: _____

YOUR ACTION ITEMS - Chapter 3

-
- [] Perform the Great Email Purge (archive old emails)
 - [] Unsubscribe from at least 20 newsletters
 - [] Set up your folder/label system
 - [] Schedule 3 specific email processing times per day
 - [] Create 3 email templates for common responses
 - [] Turn off email notifications (check on schedule only)
 - [] Process inbox to zero for the first time

Email Processing Log (2 Weeks)

Track your email processing for 14 days to build the habit:

Day 1

Date: _____

Emails received today: ____

Emails processed: ____ | Deleted: ____ | Archived: ____

CHAPTER 4: COMPUTER & FILE ORGANIZATION

Building a File System That Works

A well-organized file system means you can find any document in under 30 seconds. No more wasting 10 minutes searching for that one file, no more saving things to your desktop because you do not know where else to put them, and no more duplicates scattered across multiple folders.

The key principles of effective file organization are: few top-level folders, consistent naming conventions, and a regular maintenance habit.

Step 1: Desktop Cleanup

Your desktop should have ZERO files on it (or a maximum of 3-5 temporary items you are actively working on today). Everything else goes into your file system.

Items currently on my desktop: _____

Items that belong in my file system: _____

Items to delete: _____

Step 2: Recommended Folder Structure

Use this proven structure as your starting point and customize:

Top-Level Folders:

- 01-WORK (or business name)
 - - Projects (subfolder per project)
 - - Clients (subfolder per client)
 - - Resources (templates, guides, references)
 - - Admin (contracts, invoices, tax docs)
- 02-PERSONAL
 - - Finance (bills, bank statements, tax returns)
 - - Health (medical records, insurance)
 - - Home (lease, utilities, maintenance)
 - - Education (courses, certifications, transcripts)
- 03-CREATIVE
 - - Photos (organized by year/event)
 - - Writing
 - - Design
 - - Music
- 04-ARCHIVE (old projects, completed work)

Step 3: File Naming Convention

Consistent file names make everything searchable. Use this format:
YYYY-MM-DD_Category_Description_Version

Examples:

- 2024-03-15_Invoice_ClientName_v1.pdf
- 2024-03-15_Resume_DanielTsfamariam_v3.docx
- 2024-03-15_Budget_Q1-Review_final.xlsx

My naming convention: _____

Step 4: Cloud Storage Setup

Choose ONE primary cloud storage and use it for everything:

☐ Google Drive ☐ Dropbox ☐ OneDrive ☐ iCloud

Other: _____

Sync settings: ☐ Full sync ☐ Selective sync

Storage used: ____ GB of ____ GB available

Backup schedule: ☐ Automatic ☐ Weekly manual ☐ Monthly manual

Step 5: Browser Cleanup

Your browser is likely cluttered with bookmarks you never visit, extensions you do not use, and saved passwords that need updating.

Browser Declutter Checklist:

- ☐ Close all unnecessary tabs (bookmark important ones first)
- ☐ Organize bookmarks into folders (max 5-7 folders)
- ☐ Delete bookmarks you have not visited in 6 months
- ☐ Remove unused browser extensions
- ☐ Clear browsing history and cache
- ☐ Review and delete saved passwords for unused accounts
- ☐ Set homepage to something intentional (not news or social)
- ☐ Install an ad blocker and distraction blocker

Tabs before cleanup: ____

Tabs after cleanup: ____

Extensions removed: ____

Bookmarks deleted: ____

YOUR ACTION ITEMS - Chapter 4

- ☐ Clear your desktop completely (move everything to proper folders)
- ☐ Create your top-level folder structure
- ☐ Establish and document your file naming convention
- ☐ Set up cloud backup for important files
- ☐ Complete browser cleanup checklist
- ☐ Delete or archive files you no longer need
- ☐ Schedule a monthly 15-minute file maintenance session

CHAPTER 5: SOCIAL MEDIA DETOX

Reclaiming Your Attention from Social Media

Social media platforms are engineered by teams of brilliant psychologists and engineers to be as addictive as possible. They exploit our need for social validation, fear of missing out, and desire for novelty. The average person spends 2 hours and 27 minutes per day on social media, which adds up to over 37 days per year.

This is not about quitting social media entirely (unless you want to). It is about using it intentionally rather than compulsively, being a creator rather than a consumer, and ensuring these platforms serve your goals rather than stealing your time and mental health.

My Social Media Audit

Platform | Daily Time | Purpose | Adds Value? | Action

Instagram: ____ min/day	Purpose: _____	Value: Y/N	Keep/Limit/Delete
Facebook: ____ min/day	Purpose: _____	Value: Y/N	Keep/Limit/Delete
Twitter/X: ____ min/day	Purpose: _____	Value: Y/N	Keep/Limit/Delete
TikTok: ____ min/day	Purpose: _____	Value: Y/N	Keep/Limit/Delete
LinkedIn: ____ min/day	Purpose: _____	Value: Y/N	Keep/Limit/Delete
YouTube: ____ min/day	Purpose: _____	Value: Y/N	Keep/Limit/Delete
Reddit: ____ min/day	Purpose: _____	Value: Y/N	Keep/Limit/Delete
Pinterest: ____ min/day	Purpose: _____	Value: Y/N	Keep/Limit/Delete
Snapchat: ____ min/day	Purpose: _____	Value: Y/N	Keep/Limit/Delete
Other: ____ min/day	Purpose: _____	Value: Y/N	Keep/Limit/Delete

Total daily social media time: ____ minutes (____ hours)

Time I want to spend daily: ____ minutes

Time I will save daily: ____ minutes

That equals ____ hours/week and ____ hours/year reclaimed!

Social Media Boundaries

Set clear rules for yourself:

No social media before: _____ AM

No social media after: _____ PM

Maximum daily usage: _____ minutes

Phone-free zones: _____

Phone-free times: _____

Accounts to Unfollow/Mute (do not serve my goals):

1. _____
2. _____
3. _____
4. _____
5. _____
6. _____
7. _____
8. _____
9. _____
10. _____

Accounts to Follow More (inspire and educate me):

1. _____
2. _____
3. _____
4. _____
5. _____

The 7-Day Social Media Fast

Challenge yourself to one full week without social media. Track your experience:

Day 1

Urge to check (1-10): ____

How I spent the extra time: _____

Mood today (1-10): ____

My plan going forward: _____

YOUR ACTION ITEMS - Chapter 5

-
- [] Complete the social media audit with real screen time data
 - [] Set daily time limits on each platform
 - [] Unfollow or mute accounts that drain you
 - [] Delete social media apps from home screen
 - [] Try the 7-Day Social Media Fast
 - [] Replace scrolling time with one meaningful activity

CHAPTER 6: DIGITAL PRODUCTIVITY SYSTEM

Building Your Personal Productivity Stack

Now that you have decluttered your digital environment, it is time to rebuild it intentionally as a productivity system. The right digital tools, used well, can dramatically increase your output while reducing stress and mental load.

The key is simplicity. You do not need 15 productivity apps. You need 3-5 core tools that work together seamlessly and that you actually use consistently.

The 5 Pillars of Digital Productivity

Pillar 1: Task Management

One single source of truth for everything you need to do. No more sticky notes, random lists, or tasks scattered across apps.

My task management tool: _____

How I capture new tasks: _____

How often I review my task list: _____

Pillar 2: Calendar Management

Your calendar is not just for meetings. It is for protecting your time, scheduling deep work, and ensuring you have boundaries.

My calendar tool: _____

Do I time-block? ☐ Yes ☐ No (consider starting)

My recurring blocks:

Deep work: _____ to _____

Email processing: _____ to _____

Exercise: _____ to _____

Learning: _____ to _____

Pillar 3: Note-Taking & Knowledge Management

A system for capturing ideas, meeting notes, and information so you can find it when you need it.

My note-taking tool: _____

How I organize notes: _____

How I review notes: _____

Pillar 4: Communication

Intentional communication means checking messages on YOUR schedule, not reactively responding to every ping.

Primary communication tools: _____

My communication schedule:

Email: Check at _____, _____, _____

Messages: Check at _____, _____, _____

Slack/Teams: Check at _____, _____, _____

Pillar 5: Focus & Deep Work

Tools and techniques for protecting your attention during important work.

My focus technique: ☐ Pomodoro ☐ Time-blocking ☐ Flow state ☐ Other

My focus duration: ____ minutes per session

Tools I use: ☐ Focus timer ☐ Website blocker ☐ Noise canceling ☐ Do Not Disturb

The Pomodoro Technique Tracker

Work for 25 minutes, break for 5 minutes. After 4 pomodoros, take a 15-30 minute break.

YOUR ACTION ITEMS - Chapter 6

-
- ☐ Choose your core productivity tools (max 5)
 - ☐ Set up time-blocking in your calendar
 - ☐ Try the Pomodoro technique for one full week
 - ☐ Create your weekly planning ritual
 - ☐ Install a website/app blocker for focus sessions
 - ☐ Define your ideal daily schedule with blocks for each pillar
 - ☐ Complete the 4-week habit tracker consistently

CHAPTER 7: PASSWORD & SECURITY

Securing Your Digital Life

Digital security is an essential part of digital organization. Weak passwords, reused credentials, and lack of two-factor authentication put your personal data, finances, and identity at serious risk. The good news is that setting up strong security takes just a few hours and then protects you indefinitely.

Step 1: Password Manager Setup

A password manager is the single most important security tool you can use. It generates and stores unique, complex passwords for every account so you only need to remember one master password.

Recommended options: 1Password, Bitwarden, LastPass, Dashlane

My chosen password manager: _____

Master password hint (DO NOT write the actual password): _____

Recovery method set up? ☐ Yes ☐ No

Emergency access person: _____

Step 2: Account Security Audit

Review each important account and update security:

Account | Strong Password? | 2FA Enabled? | Recovery Set?

Primary Email:	Password ☐	2FA ☐	Recovery ☐
Secondary Email:	Password ☐	2FA ☐	Recovery ☐
Bank Account 1:	Password ☐	2FA ☐	Recovery ☐
Bank Account 2:	Password ☐	2FA ☐	Recovery ☐
Credit Card:	Password ☐	2FA ☐	Recovery ☐
Investment Account:	Password ☐	2FA ☐	Recovery ☐
Social Security/Gov:	Password ☐	2FA ☐	Recovery ☐
Health Insurance:	Password ☐	2FA ☐	Recovery ☐
Phone Provider:	Password ☐	2FA ☐	Recovery ☐
Internet Provider:	Password ☐	2FA ☐	Recovery ☐
Cloud Storage:	Password ☐	2FA ☐	Recovery ☐
Social Media 1:	Password ☐	2FA ☐	Recovery ☐
Social Media 2:	Password ☐	2FA ☐	Recovery ☐
Amazon/Shopping:	Password ☐	2FA ☐	Recovery ☐
Streaming Service 1:	Password ☐	2FA ☐	Recovery ☐
Streaming Service 2:	Password ☐	2FA ☐	Recovery ☐

Work Email: Password ☐ | 2FA ☐ | Recovery ☐
Work Systems: Password ☐ | 2FA ☐ | Recovery ☐
Apple/Google ID: Password ☐ | 2FA ☐ | Recovery ☐
Password Manager: Password ☐ | 2FA ☐ | Recovery ☐

Step 3: Two-Factor Authentication (2FA)

Enable 2FA on every account that offers it, starting with these critical ones:

- ☐ Primary email account (most important - this is the master key)
- ☐ Bank and financial accounts
- ☐ Apple ID or Google Account
- ☐ Social media accounts
- ☐ Cloud storage (Google Drive, Dropbox, iCloud)
- ☐ Password manager itself
- ☐ Work accounts
- ☐ Shopping accounts with saved payment info

Preferred 2FA method: ☐ Authenticator app ☐ SMS ☐ Hardware key

Authenticator app used: _____

Backup codes stored safely? ☐ Yes Location: _____

Step 4: Digital Emergency Plan

What happens to your digital life if something happens to you? Create a plan:

Trusted person who knows my master password: _____

Location of emergency access instructions: _____

Important accounts they would need access to:

1. _____
2. _____
3. _____
4. _____
5. _____

YOUR ACTION ITEMS - Chapter 7

-
- ☐ Choose and set up a password manager
 - ☐ Generate unique passwords for your top 10 accounts
 - ☐ Enable 2FA on all critical accounts
 - ☐ Store backup codes in a safe physical location
 - ☐ Create a digital emergency plan
 - ☐ Delete accounts you no longer use

BONUS: ACCOUNT CLEANUP & DIGITAL FOOTPRINT

Audit Your Online Accounts

Most people have 80-100+ online accounts, many of which they have forgotten about. Each account represents a potential security vulnerability and a piece of personal data floating in cyberspace. This audit helps you identify, clean up, or delete accounts you no longer need.

Go through each category and list every account you have:

NEXT STEPS

You now have a complete system for maintaining a clean, organized, and intentional digital life. The key to long-term success is building maintenance habits that prevent clutter from accumulating again.

Monthly Maintenance Checklist

- ☐ Process email inbox to zero
- ☐ Delete unused apps from phone
- ☐ Review and update passwords for any breached accounts
- ☐ Clean up downloads folder
- ☐ Review subscriptions for anything to cancel
- ☐ Back up important files to cloud
- ☐ Review screen time and adjust limits if needed
- ☐ Clear browser tabs and bookmarks

Quarterly Maintenance

- ☐ Full phone audit (apps, photos, storage)
- ☐ File system review and reorganization
- ☐ Security audit (passwords, 2FA, backup codes)
- ☐ Retake Digital Overwhelm Assessment
- ☐ Review and update productivity system
