Table of Contents

1. Understanding Thyroid Health
 2. Your Thyroid Assessment
 3. Lab Tracker & Interpretation
 4. Nutrition for Thyroid Health
 5. Daily Symptom Tracker
 6. Lifestyle & Supplement Guide
 7. Progress Review
 8. FAQ & Resources
-

Introduction

Thyroid conditions affect an estimated 20 million Americans, and up to 60% are undiagnosed. Whether you have hypothyroidism, Hashimoto's thyroiditis, or are trying to optimize your thyroid function, this workbook provides comprehensive tracking tools and evidence-based strategies.

Chapter 1: Understanding Thyroid Health

What Does the Thyroid Do?

The thyroid is a butterfly-shaped gland in your neck that produces hormones controlling metabolism, energy, temperature, heart rate, brain function, and virtually every cell in your body.

Key Thyroid Hormones

- TSH (Thyroid Stimulating Hormone): Brain's message to thyroid
- T4 (Thyroxine): Inactive storage form (produced by thyroid)
- T3 (Triiodothyronine): Active form (converted from T4 in body)
- Reverse T3: Inactive T3 (produced during stress)

Hypothyroidism (Underactive)

Common Symptoms

- Fatigue and sluggishness
- Weight gain or inability to lose weight
- Cold intolerance
- Constipation
- Dry skin and brittle nails
- Hair loss (including outer third of eyebrows)
- Brain fog and poor memory
- Depression and low mood
- Muscle aches and joint pain
- Heavy or irregular periods
- High cholesterol

Hashimoto's Thyroiditis

Hashimoto's is an autoimmune condition where the immune system attacks the thyroid gland. It is the most common cause of hypothyroidism.

- Affects 5% of the population (10x more common in women)
- Diagnosed by thyroid antibodies (TPO, TgAb)
- Can fluctuate between hypo and hyper symptoms
- Autoimmune = immune system dysfunction, not just thyroid
- Often occurs alongside other autoimmune conditions

Chapter 2: Your Thyroid Assessment

Symptom Checklist

Rate each symptom 0-5 (0=none, 5=severe)

Fatigue/low energy: ____/5

Weight gain: ____/5

Cold hands and feet: ____/5

Hair loss or thinning: ____/5

Constipation: ____/5

Dry skin: ____/5

Brain fog/poor memory: ____/5

Depression or low mood: ____/5

Joint/muscle pain: ____/5

Puffy face or swelling: ____/5

Hoarse voice: ____/5

High cholesterol: ____/5

Slow heart rate: ____/5

Heavy periods: ____/5

Difficulty concentrating: ____/5

Total Score: ____/75

Chapter 3: Lab Tracker & Interpretation

Complete Thyroid Panel (request ALL of these)

Many doctors only test TSH. For full picture, you need:

TSH

Optimal range: 0.5-2.0 mIU/L (functional optimal)

Note: Standard: 0.4-4.5

Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____

Free T4

Optimal range: 1.0-1.5 ng/dL (optimal)

Note: Standard: 0.8-1.8

Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____

Free T3

Optimal range: 3.0-4.0 pg/mL (optimal)

Note: Standard: 2.3-4.2

Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____

Reverse T3

Optimal range: Under 15 ng/dL (optimal)

Note: High = conversion issue

Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____

TPO Antibodies

Optimal range: Under 35 IU/mL

Note: High = Hashimoto's

Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____

Thyroglobulin Antibodies

Optimal range: Under 1 IU/mL

Note: High = Hashimoto's

Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____

Vitamin D

Optimal range: 50-80 ng/mL (optimal)

Note: Most are deficient

Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____

Iron/Ferritin

Optimal range: 70-90 ng/mL (optimal for thyroid)

Note: Low impairs conversion

Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____

B12

Optimal range: Over 500 pg/mL (optimal)

Note: Under 300 = suboptimal

Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____ | Date: __/__/__ Result: ____

Chapter 4: Nutrition for Thyroid Health

Essential Nutrients for Thyroid

- Iodine: Needed to make thyroid hormone (seaweed, fish, iodized salt)
- Selenium: Converts T4 to T3 and reduces antibodies (2-3 Brazil nuts daily)
- Zinc: Required for T3 production (pumpkin seeds, beef, oysters)
- Iron: Necessary for thyroid enzyme function (red meat, lentils)
- Vitamin D: Immune modulation (sunlight, fatty fish, supplement)
- B12: Energy and nerve function (animal products, supplement)
- Magnesium: Supports conversion and reduces inflammation

Foods to Emphasize

- Wild-caught fish (salmon, cod, sardines)
- Brazil nuts (2-3 daily for selenium)
- Seaweed in moderation (iodine)
- Grass-fed meat and organ meats
- Eggs (contain iodine, selenium, B12)
- Colorful vegetables and fruits
- Fermented foods (gut-immune connection)
- Bone broth (gut healing)

Foods to Consider Limiting

For Hashimoto's specifically

- Gluten: Strong association with Hashimoto's - trial elimination recommended
- Dairy: Can be inflammatory for some
- Soy: May interfere with thyroid medication absorption
- Raw cruciferous vegetables in LARGE amounts (cook them instead)
- Excess sugar and processed foods (inflammation)

7-Day Thyroid Support Meal Plan

Monday

- Breakfast: Eggs + avocado + 2 Brazil nuts
- Lunch: Salmon salad with olive oil
- Dinner: Chicken with roasted vegetables and quinoa

Tuesday

- Breakfast: Smoothie: berries + protein + collagen
- Lunch: Bone broth soup with vegetables
- Dinner: Baked cod with sweet potato and greens

Wednesday

- Breakfast: GF oatmeal with pumpkin seeds and berries

- Lunch: Turkey and veggie wrap (GF)
- Dinner: Grass-fed beef with rice and broccoli (cooked)

Thursday

- Breakfast: Eggs with sauteed spinach and mushrooms
- Lunch: Lentil soup with GF bread
- Dinner: Baked salmon with asparagus

Friday

- Breakfast: Coconut yogurt + nuts + seeds
- Lunch: Large salad with protein and tahini
- Dinner: Slow cooker chicken with root vegetables

Saturday

- Breakfast: Sweet potato hash with eggs
- Lunch: Leftovers and fresh vegetables
- Dinner: Fish with cauliflower mash and greens

Sunday

- Breakfast: GF pancakes with berries
- Lunch: Bone broth + grain bowl
- Dinner: Roast chicken with seasonal vegetables

Chapter 5: Daily Symptom Tracker

Daily Thyroid Tracker - Page 1

Chapter 6: Lifestyle & Supplements

Medication Tips

- Take thyroid medication first thing, on empty stomach
- Wait 30-60 minutes before eating
- Wait 4 hours before calcium, iron, or coffee
- Take at the same time daily
- Do not stop or change dose without doctor guidance

Supplements for Thyroid/Hashimoto's

- Selenium: 200mcg daily (critical for Hashimoto's - reduces antibodies)
- Vitamin D3: 2000-5000 IU (test and optimize)
- Zinc: 15-30mg daily
- B-complex: Energy and conversion support
- Magnesium glycinate: 200-400mg
- Iron: Only if deficient (test ferritin)
- Omega-3: Anti-inflammatory

Stress Management (Critical for Hashimoto's)

Stress directly suppresses thyroid function and increases autoimmune activity.

- Adaptogenic herbs: Ashwagandha (caution: may not suit all thyroid conditions)
- Daily meditation or breathwork
- Adequate sleep (8+ hours for thyroid patients)
- Gentle exercise (avoid overexercise with hypothyroidism)
- Set boundaries and reduce obligations

Chapter 7: Progress Review

Week 1 Review

Date Range: __/__/__ to __/__/__

Energy level average this week (1-10):

Brain fog frequency:

Weight trend:

Bowel regularity:

Hair loss observations:

Mood average:

Medication taken consistently: []Y []N

Lab work scheduled/completed:

Week 2 Review

Date Range: __/__/____ to __/__/____

Energy level average this week (1-10):

Brain fog frequency:

Weight trend:

Bowel regularity:

Hair loss observations:

Mood average:

Medication taken consistently: []Y []N

Lab work scheduled/completed:

Week 3 Review

Date Range: __/__/____ to __/__/____

Energy level average this week (1-10):

Brain fog frequency:

Weight trend:

Bowel regularity:

Hair loss observations:

Mood average:

Medication taken consistently: []Y []N

Lab work scheduled/completed:

Week 4 Review

Date Range: __/__/____ to __/__/____

Energy level average this week (1-10):

Brain fog frequency:

Weight trend:

Bowel regularity:

Hair loss observations:

Mood average:

Medication taken consistently: []Y []N

Lab work scheduled/completed:

Week 5 Review

Date Range: __/__/__ to __/__/__

Energy level average this week (1-10):

Brain fog frequency:

Weight trend:

Bowel regularity:

Hair loss observations:

Mood average:

Medication taken consistently: []Y []N

Lab work scheduled/completed:

Frequently Asked Questions

Q: Why does my doctor say my labs are 'normal' but I still feel terrible?

Standard lab ranges are very wide. You can be 'within normal' but far from optimal. Advocate for a full panel and ask about functional/optimal ranges. Consider a functional medicine practitioner.

Q: Can Hashimoto's be reversed?

The autoimmune process can be slowed or put into remission (lowered antibodies, improved function). Gluten elimination, selenium, and gut healing show the most promise.

Q: Should I avoid all goitrogens (cruciferous vegetables)?

No. Cooking reduces goitrogenic activity by 80%. Only raw, massive quantities cause issues. Cooked broccoli, cauliflower, etc. are healthy choices.

Q: Can stress affect my thyroid?

Absolutely. Stress increases reverse T3 (blocks active T3), suppresses TSH, and in Hashimoto's can trigger autoimmune flares. Stress management is essential.

Q: How long does thyroid medication take to work?

You may notice some improvement in 2-4 weeks, but full effects take 6-8 weeks. Labs should be rechecked 6-8 weeks after any dose change.

Q: Is natural desiccated thyroid (NDT) better than levothyroxine?

Some patients do better on NDT (contains both T4 and T3), while others do well on levothyroxine alone. Work with your doctor to find what works for you.

Q: Can I exercise with hypothyroidism?

Yes, but honor your energy levels. Start gentle, progress slowly. Overexercise can worsen fatigue. Walking, yoga, and moderate strength training are excellent choices.

Q: Does gluten-free really help Hashimoto's?

Multiple studies show gluten-free diets reduce thyroid antibodies in Hashimoto's patients. The molecular structure of gluten resembles thyroid tissue (molecular mimicry). Trial 3-6 months.

Quick-Reference: Daily Thyroid Wellness Checklist

- ☐ Took thyroid medication on empty stomach
- ☐ Waited before eating/coffee/supplements
- ☐ Ate selenium-rich food (Brazil nuts)
- ☐ Consumed adequate protein
- ☐ Managed stress (breathing, rest)
- ☐ Got adequate sleep (8+ hours)
- ☐ Gentle movement/exercise
- ☐ Avoided dietary triggers
- ☐ Tracked symptoms
